Climatic Conditions

2008 has been a true patience test in order to obtain fruity and very well-balanced wines. A cleaning harvest started on 25th September. The weather at that time was amazingly nice and botrytis took a long time to settle. Our patience was rewarded.

Ripening phases

Flowering: 2nd June / Véraison (colour change in berries): 13th August

Harvest

The harvest started at the beginning of the month of October.

Yields

12,03 hl / ha

Winemaking

The grapes are attacked by botrytis cinerea and are then harvested in several waves. Each lot, carefully selected, is slowly squeezed. Part of the grapes are fermented in new oak barrels. It lasts for 2 to 4 weeks in a temperature-controlled cellar. The wine spends between 12 and 18 months in barrels (50 % of which are new oak), and is then blended and bottled.

Production

58 500 bottles

The blend

80% Sémillon / 20% Sauvignon Blanc

Tasting notes

Topaz yellow colour. Intense on the nose. A fantastic floral potential of acacia, orange blossom and also bergamot. The attack on the palate is supple with lots of freshness. Fantastic harmony alcohol / sugar / acidity. An enticing wine showing an exciting aromatic range.
